

[Amplac] ⁵²¹³ 48 dia, lat N.

i [spot and box] [downing]
→ ticket (note) [Car 3] (48) conductor

i [Car (box) schedule, ticket] form, lat needs a ride to San Diego, should be left open or special.
- schedule analyzed
- ticket stored

N → [Car 3, Apt] U, low W → [how many] windows, side, ^{flourescent} min close door
(need light)
turn on side

(Car 2)
Mid box (bunk) (E)

scales - left beaker, right beaker

glass box, black sphere

glass dish, metal coil, breadboard, glass tube, swirling gas, gold wire

metal box (scalant)

- going to San Diego

left beaker	right beaker
NaOH	HCl
500ml mag	
i glass probe	
Sodium oxide	hydrochloric acid

hydroxide (base, empty?)

lotus (red powder, in plastic tube)

acid: hydrochloric acid (HCl) very corrosive

hydroxide: sodium hydroxide (NaOH) may explode if mixed improperly with acids

developing fluid: contains sodium cyanide (may produce toxic vapors)

use Car 4 Apt as cache location. (red bulb, lotus)

pour acid - fluid. not fluid invert.

Car 5: N/S, knowers, all checked (cars)

Car 6: Conductor is missing? ask passengers aft conductor/engie
- he could get to engine by crawling over top of train.

aft turnouts - George stupidly asked for water

tell aft turnouts - delivered.

throttle, emergency brake, speedometer, temperature gauge, brass plaque.

ask conductor at terminals,
bank
train (cant stop, may be badly trapped)

Diesel Engine mtd. #1

Manufactured on
September 30, 2000

Chief Designer: R. M. M. M.

throttle - (open but pulling, only 1/2 open)
brake (red ball & cord, pull it at stops)

Speedometer 60MPH.

temperature gauge (green zone between red (bookst) & yellow (flame out))

train on socket.
- glass tube sticks out of back of the box, gas in tube, gold wire
- glass dish under inlet coil
- plywood box in etc
- black sphere in glass box
- scales above box → left beaker + right beaker
NaOH HCl

- break glass tube (fireball)

- ammonia or sealant (noting)
- acid on sealant (doubtful)
- hydrochloric on sealant (doubtful)
- lithium?
- tube?

look in left beaker (wood lined)
right beaker (wood lined)

put lithium in left beaker - dk blue
right beaker - bright red
pour acid in left beaker - deep purple

left + acid = 200 deep purple

right + ammonia = 500 dk blue

open bottle → gas tube cracks → explosion

Score

- 5 - string on train
- 1 - chain part
- 5 - screw in inlet at back
- 3 - getting to caboose
- 5 - getting to mail car
- 5 - neutralizing the terminals that
- 5 - getting to two engines
- 5 - linking the boxes under the train
- 5 - base who in photo
- 5 - remove rose pure
- 5 - defacing photos
- 10 - removing black sphere

puncture X into sealant?

puncture tube into sealant (✓)

(The hole left by the end of lubricant seals itself)

white powder

cut pin with diamond (+5)

take dish (+5)

Acid can 5 under side (long red wire (+5))

pull red wire (car 6 explodes! wire essential)

black plastic box (car 2 under side)

(strip of red wire)

white plastic box (under car 6)

take it! 5* → take black box.

(throw it off train?) (dull explosion)

you can push the ice chest, give soda to passengers.

* - right beaker turns deep purple at 350ml. (spurt ammonia in right beaker several times)

from acid in left beaker → deep purple at 200ml.

take black sphere. take photograph.

Show photograph to conductor {show to passengers?}

give sphere to conductor {he knocks you out!}

show photograph to passenger (examine person, telephone) → none of passengers resemble pilot → it's the conductor!

give wolfie to conductor (don't get worked)

+10 saving the other passengers (but your brother & friends die in nuclear accident)

+10 getting black sphere off the train.

put sphere in ice chest. close ice chest. (fits snugly)

drop black s. [+20 save passengers + eliminate sphere threat] (unhooked 4 to 5)

ask conductor what boat → (knocked out, I'm going to slam train into the reactor!) {Williams? Lily?}

ask conductor what lily (glass eye falls, leaving empty socket)

take spider. show spider at conductor.

take spider. ask conductor what lily - take eye. pull throttle (not push) (+5)

show spider. pull cord. ⇒ [Crash Site] beam on broken legs.

yell. {conductor moans} 2* [Cajoleman (on the check chair)] Jack holding wedding piece.

Jack, kind. {ring cost} remove ring give ring to Jack (100 out of 100) AMERICA

AMUSIM: ring to conductor? sing everyone? show Wolfie at everyone? yell? do stuff & bodies? drink soda? leave soda inside when you push it off the train?

push ice chest & hatch then praying? begin TECHNICAL mode when train crashes? go U or D from crash site? checking score at crash site?

(+5 speeding up the train; +10 decelerating the train, +4 giving ring to Jack)

THE BEST MAN
(bestman. 25)

[SQUEEZE x ON y
POUR 200ML FROM x INTO y]

z = 51 terrorists!

CAR 3
SEAT 4B
