

(appears written in homemade Javascript!)

- instead of clicking links, one uses the keyboard to enter the choices offered ?? or any key when no choice
- frequent clearing of screen! (so only one line or 3 ~~is~~ is visible)
- the text fades if y let her go after refusing blessing from weird church.

(Story: Dating Caroline at restaurant; after wine brought, C refused to stay (waiter creeps her out).

Go to her place & have dinner there (sprung \bar{c} courts (?))

& promise to meet her at park tomorrow after she reads a weird poem.

Next day, C leads y to a church where Priestess asks y

several odd questions. ~~locked in~~ After, y's invited to join ceremony

(BUT can't leave if y don't want to). P wants to bless y ("y'r a lost soul")

& C won't be allowed to date y without it.

She refuses to ~~do~~ it compromise or discuss afterwards; she's angry.

So I let her go.)

- no option to restart (or anything) at end - it's a completely blank screen.
