

y = Alexandra Sullivan, 23 y-o biochemist from Ireland.

bc = [Leah] on spruce. { counter, desk, exam table, W, N, Mark } i { jumpseat }
Rehearsal

x mark { accident makes him breathe in 'hormones' powder \Rightarrow naked + masturbation } (cork, powder)
ask Mark powder (don't touch it! don't breathe it!)

x counter (microscope, eyeglasses, fluids, gloves, mask) x microscope (not working; set point) ^{perched}
'please Heather!' (D) - ~~open~~ desk (computer, drawer (syringe, slide))

use syringe on Mark (he won't co-operate) (eventually Mark attacks y; end game)

W \rightarrow Habitatation (bedroll) // N \rightarrow Storage (container, wrench)
- blue vial, red vial, yellow vial, white vial.
(all are "medical liquids")

ask Mark cork (touch it! suck it!)

- but y could? do you have to 'x mark' first?

- "take gloves" ~~doesn't~~ doesn't work if you haven't "x counter" first.
