 [Helicopter] (H) panel, yoke pull job (wires), E if want too long, Carla uses voice-  
 activated autopilot & x John (fork shaped). fake wires. tie Carla's wires (win!)

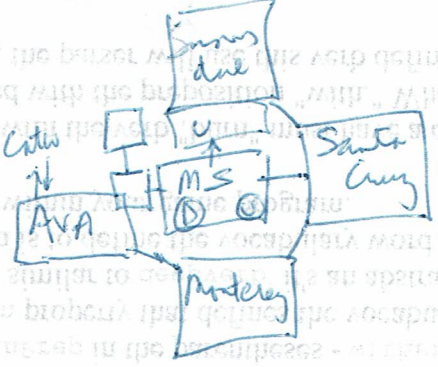

FORNICATION (verb) - to have sex with someone who is not your spouse.  
 FORNICATION (noun) - the act of having sex with someone who is not your spouse.  
 FORNICATION (noun) - a person who has sex with someone who is not their spouse.

terminating method only gets the actor. The definitions should look like this:  
 actor as a parameter two of the two-verb methods get an additional parameter: the other object. The  
 single-object verbs. Whereas a single object verb's verification and action methods only take the  
 the verification and action methods for verbs with two objects are a little different than those for  
 objects for a two-object continuing

verb is called only for the indirect object. The target never calls an action method in the direct  
 verification method. The direct and successful then the target calls the action method. However, it  
 is the direct object - and they're called in that order with the indirect object going first. If you  
 might guess from the names - for verification is sent to the indirect object and successful is sent  
 another for the indirect object. The methods are called verification and successful. You  
 are involved if your getting not one but two verification methods. one for the direct object and  
 one for the indirect object. Similarly defined verification and action methods but since two objects  
 from the root getting a verification method (getting with a bar) an action method (getting with  
 a bar) are defined. We mentioned that an actor can define three methods. Keys that have been defined are two methods
