tired of Myrmidon, y decide to visit other worlds via Horizon of Night.

[Myrmidon -- the Docks] keel, sails, compass; need only weigh anchor.

x ore {Y in an unperceived model}

sigh anchor => [-- Far Orbit] snow-miners & far factories

unfurl sails {=> sails slightly raised} => [The Hinder Arm] x stars
unfurl sails {=> sails partly raised} => [The Spindrift Stars] cluster
unfurl sails {=> sails fully raised} => [The Dark Reaches]

2. {A yellow star catches your eye}
// {A golden star catches your attention} furl sails => [Somewhere -- Far Orbit] jangles from orbit gas gint.
listen to gas gint. go to it. => [Gas Giant -- Atmosphere] kilometer long gaseous things? Soggy?

x shapes. {tissues peek?} take tissue {store it in hold} u => [-- Far Orbit]

u => [Nebula Periphery] {stellar nebula ahead}
z => [Interior of Nebula] 2. {Sails are too taut}
loosen sail => {sails loose, slightly raised} => [Pulsar's Nest] void battle amid bright pulsar.

x pulsar. x beams. (48.327 rps)
tauten sails. g. => [Corridor in Nebula] small blue-white star

close sail => [Somewhere Else -- Far Orbit] planetoid z around glow.

d => [By Planetoid] pale light pooling in craters... take light (no mass or temp.?)
out [-- Far Orbit] out => [Galactic Halo] z => [Hollow Spaces] neutrino flux on far side of a shallow
babble.. z {too slow?} [Somewhere in the Halo] z [Hollow Spaces]
open sails [X-Ray Binary] flux is behind the binary {sails partly raised}
Sails ripple.
tauten sails [Crowded Cluster] flux is in a certain range of stars
close sails {sails taut, slightly raised} => [Birth Clouds] flux is beyond dust; sails are shuddering.
loosen sails => {slightly raised} [Empty Void] need speed & cross void
open sails {partly raised} [Approaching Brown Dwarf] flux is coming from near the star.
close sails {furled} [Somewhere Again -- Far Orbit] planet is crushing the dwarf.
x planet (source or locus of neutrino shift)              x tablets {frozen helium} take tablets
d => [Ice-World] tablets/monuments, snow.

u. u → [Approaching Rollty Star] red supergiant

close sails {Shockwave} [Darkness] (adrift)

x ship {sails destroyed & compass is cracked}

x Compass {most of superfluid helium has boiled away}

put tablets in compass {it should now function, but without inertial memory

raise cloth (sails furled)

Open light. open sails {the sails get you home, but they turn to vapor on the way} [WIN]

AMUSING: raise, lift, hoist, heave, haul, spread, widen, broaden, lower, unfurl, unfold,
unreef, reef, narrow furl, fold, trim, tauten, slacken, rig.

also: set / strike / more / less sail.

also: go, fly, forward, ahead, push on, forge onward.
go to, fly / vector / steer toward.

but not: warp 8.
