

- arrived at str. Drop Team Beta (you): review mission profile + report to Primary Transport Km (about)

Möbius

[1/4 Quarters] (on ground) dark, sidem, Tactical Display Unit, hatch (port aka west)
x oc. x uniform (bright red) } Jrg
(TDU, on/5th) Rep ahead.

doors out: // in status
doors - report line
status on: //
walk through

turn on TDU { Free status bar:
[hijinks: 1 UST: 1:25 am] ← white on black.
[New MP available MRL: none]
time on black

x mp > distress rec'd from scientists in project Möbius; local contact; transport to lab + investigate (aid: med + tech)
project is studying temporal anomalies (classified statute MSC-131h); radiation level possible
- minimal gear: TDU, sidem, basic specialty-specific equipment (yr specialty + security)

Primary Long - Report to Primary Transport Km now

out → [Passageway] (on Solaris a secret ship) heads to port, among + runs, etc aft.
forc → [Primary Transport Km] Sgt Jacobson, Medic Davis (med kit), Specialist Thorne (technical sensor)
turn on tdu. yes. sergeant, yes. (Watch the MRL levels) He, somewhat polite

[Möbius Laboratory] MRL: low. equipment (communications array + transporter) channel, table, cabinet (for energy)

'Temporal Reactor' (closed panel on wall next to it) head scientist + her asst lie here severely burned + uncon.
(y were transported first to same area) x head scientist (metallic rod in one foot, pointing to reactor)

x rod (absolutely red) used to absorb radiation: x assistant (coat is unburned) unbitten.
MRL: moderate (y had) take coat. wear cont. (read helmet, gloves, thick ear box) take rod. (MRL: critical)

Open panel (interior building tone) put rod in reactor (for dangerous → reactor explodes)
[MRL] hijinks: inconclusive (another maine?) talk to machine (yr hand passes thru it) open cabinet (no observations)

hit it. shoot it. x table (wrench, wrench, radiation dumper)
x dumper (about to activate it, switch it on to react not building)

in cabinet
{ just aid kit, various petty,
mini-blower, absorbing cone.
