Gremlins infest the maze and are numerous in the lair. One hit destroys them, but they burst into flame destroying one item at random in your inventory — if they're too close. If you delay, they'll fire off a fireball which does much the same thing. You'll lose strength and life when too close to a gremlin. Always use long distance attacks! To enter lair is suicide; firing into the lair is recommended.

Unknown what the lair conceals.
