

(see also
UNDEROOS)

in Landing Bay: "Airlock sealed"

in Pool Rm: "Sickbay operational"

in Weir Rm: "Welcome, Captain"

touch rebreage: "lie on the chair, Captain"

enter rebreage: "Simulation. BLINK to end it. Star is hungry & needs food."

Ask Star questions here. (In the dark). or give it orders.

- ask star about star - out of nitrogen (may get some thru mobius gate)
- ask star about mobius gate - can ~~not~~ travel to planet surfaces within range.
+ I'd need a wrist recall device to activate gate from planetside.
- ~~ask~~ re: wrist recall device: To operate: TWIST IT. Inventory item C-462.
- ask star about beetle: order beetle to fetch items (one of 8000 in inventory)
- ask star about food - planet Z29 has it. Only need to open the gate for a few minutes to recharge. But only on Cpt's order.
- ~~ask~~ re: Z29: rich in nitrogen & oxygen.
- beetle, fetch C-462 (bracelet) & take it (auto worn)
- star, open gate \gg Z29. (Gateway open)
- enter hole \Rightarrow A low Hill, on Earth (all dies Δ) stronger gravity D. ($\frac{win}{\sqrt{r}}$)
