Now you can page down the list of files at your own leisure.

But the fun doesn't stop here! We can pipe more than two commands together. The command head is a filter which displays the first lines from an input stream (here, input from a pipe). If we wanted to display the last filename in alphabetical order in the current directory, we can use:

head -1

Pictogram room
(figure (prostituted), pedestal (barnyard animals in twisted positions)
x black book (Voodoo For Dummies)
  — 1) Find a suitable doll, 2) Soak it in leopard saliva,
  3) Dress it in the victim's anger 4) Find a suitable torturing device
  5) Torture doll.
