

6:45-

Diagram illustrating the relationship between strain and stress:

The diagram shows two rectangular blocks. The left block is labeled "Strain" and has a vertical arrow pointing downwards. The right block is labeled "Stress" and has a vertical arrow pointing upwards. A diagonal line connects the top-left corner of the "Strain" block to the bottom-right corner of the "Stress" block. The word "Ching" is written below the "Stress" block.

Morgan has keys (after locking up Kaffer) M has journal (Blood signature record)  
Type "L pseud"

## ASK COMPUTER ABOUT <X>

~~trans~~

Cross-ASK computer

Transfer - cross-species (higher animals work in lower, but not reverse)

Nord - won Nobel Prize for hyperspatial math in 2033. 7.8 yrs of facility

hordta Morgan - med officer.

Facility / Cliffside Underground Research Laboratory - in 2029, classified projects  
me (Ian Foster) - paper on n-space geodesics (first pcc in transfer theory)

Computer - limited to central; is an LR-42

Ingol, Robert - security

Overseers - supervise facility, but secret

geodesics - defined shortest distance between 2 pts in n-space non-orthogonal

Shift (on ascant, hf) - see Morgan  
look at needle & boracite

Precipice

ledge, pole (call button) → calls lift

path (N) under slab of boracite

gate - opens from other side

look at atom in boracite → see cocoons in palm-leaf

push lever (to go down)

focus on keypad

M/K-A-N-?-A-?-R/T-A-?

MANHATTAN

Kylin's cage - food + water receptacle

chimp's habitat - "banded" - Pan Troglodytes, boulders, receptacles

M's Q's: quilt, vase & flower, photo of Manhattan, antique armchair  
(journal + keys)

M's journal: Max? *TEMPUS FUGIT*

beaker of X-4 in dissector

blood + X4  $\Rightarrow$  color change

- broke off with Max (saw no trace)

brown - reptile  
 purple - lower mammal  
 yellow - insect/crustaceans  
 green - human

- Morgan can now identify specific individuals

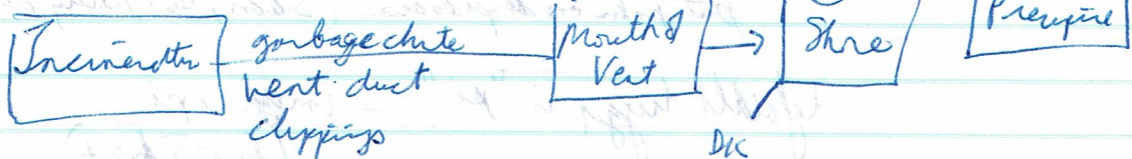

- Keys open cages.

- Ingot put Kafka in incinerator!?

- Kyle has ballbearing

- pg of Kyle's notes is missing

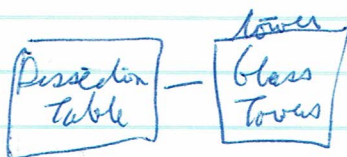

- ask Kyle about beaking

Annex: Ingot, rifle, video archives, monitors, control etc

Inlet - palm, coconuts, dense

P5 Q's "TEMPUS FUGIT"  
 bed, tub, statue, sleeve,  
 becolates, calendar,  
 walls

Calendar - brain scan on 16<sup>th</sup>, PO  
 (July 2042) install P7B on 18

Kafka's cage key is missing

x july 2042 (video in Annex)

phys

16, 0800, medlab → see Morgan giving brain scan to Prof

13, 0900, medlab → M gives Prof a physical

22, 1115, Commons →

Prof reaches to left eye of statue

Prof diagnoses a brain tumor on Sun, Tue drops

Prof asks M to see him at 715 tomorrow. [+1]

info on 23 has yet to be uploaded.

7/18/42 on Bank

7/12/42

7/16/42 -

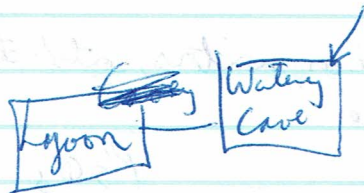

put ball in eye (S exit) → Private Balcony

dish, basin, counterpoint

drawn ↑ palm impression

put palm on depression (Scan, but nothing else)

default trigger is "pi" - imagine pi  
(first 7 digits)

take  
glider  
(mosquito)

Kyle has Prof's  
blood signatures!

hypo (ephedrine - stimulant  
or xylazine)  
- trans

Kafka imagine pi  
inject Kafka

Prof in Kyle's body  
Kyle in Kafka's body  
Kafka in Prof's body
